Table of Contents: Volume 4, 1995

Number 1

Schensted Algorithms for Dual Graded Graphs ..... *Sergey Fomin* 5

Combinatorial S_n-Modules as Codes ..... *Robert A. Liebler and Karl-Heinz Zimmermann* 47

The Homology of Partitions with an Even Number of Blocks ..... *Sheila Sundaram* 69

Number 2

The Uniformly 3-Homogeneous Subsets of $PGL(2, q)$ ..... *Jürgen Bierbrauer* 99

On Spin Models, Triply Regular Association Schemes, and Duality ..... *François Jaeger* 103

An Essay on the Ree Octagons ..... *M. Joswig and H. Van Maldeghem* 145

Group Weighted Matchings in Bipartite Graphs ..... *R. Aharoni, R. Meshulam and B. Wajnryb* 165

Twisted Extensions of Spin Models ..... *K. Nomura* 173

Number 3

Tough Ramsey Graphs Without Short Cycles ..... *Noga Alon* 189

A Note on Varieties of Groupoids Arising from m-Cycle Systems ..... *Darryn E. Bryant* 197

Splitting the Square of a Schur Function into its Symmetric and Antisymmetric Parts ..... *Christophe Carré and Bernard Leclerc* 201

Polygon Posets and the Weak Order of Coxeter Groups ..... *Kimmo Eriksson* 233

On Generators of the Module of Logarithmic 1-Forms with Poles Along an Arrangement ..... *Sergey Yuzvinsky* 253

Number 4

Quasi-Varieties, Congruences, and Generalized Dowling Lattices *Andreas Blass* 277

Some p-Ranks Related to Orthogonal Spaces ..... *Aart Blokhuis and G. Eric Moorhouse* 295

A Family of Antipodal Distance-Regular Graphs Related to the Classical Preparata Codes ..... *D. de Caen, R. Mathon and G.E. Moorhouse* 317

Some New Cyclotomic Strongly Regular Graphs ..... *C.L.M. de Lange* 329

Plactification ..... *Victor Reiner and Mark Shimozono* 331
